

ASA SPANISH ROOFING SHEET

IROOF, the revolutionary polymer based Spanish style roofing sheet, introduced to Sri Lanka, now has become the most trusted roofing solutions and the most popular roofing brand in the market.

This unique product is manufactured with a special synthetic resin formula and very especially with a layer of ASA material (Acrylonitrile Styrene Acrylate) that gives extended life time and an all-weather resistant quality to this roofing sheet. ASA (Acrylonitrile Styrene Acrylate) is a high tech formula that has higher resistance towards sun heat. This special material is used even on satellites to avoid heat and UV rays in the space. So **IROOF** roofing reduces the heat inside the home and cuts off harmful UV rays maintaining cool and comfortable environment inside the home even in hot and dry seasons while preserving the colour of the roof for years.

IROOF is a 100% environmentally friendly and hygienic product. **IROOF** does not contain any cancerous material or any other harmful material to any living being. And further this product does not discharge any radioactive rays which is harmful to human health. So living in a home with **IROOF** Roofing is free of any health issues and ensures a healthy living with confidence.

IROOF is available in 4 different colours that can be chosen as per the individual interests. The standard width of **IROOF** is 3 feet and 5 inches and available in 10 different lengths from 5' 9" to 20'10". This remarkable availability of 10 different sizes ensures cost savings through zero or minimum wastage. And 100% waterproof roof by using a one single sheet for the full length requirement. Further the maximum weight of 1 Sq.Ft of **IROOF** is 500 grams. Hence it is almost 8 times lighter than traditional clay tiles. So the structural material consumption is comparatively low giving a time and money saving to the customer. (The recommended length of the rafters and purlins is 30") Due to non-absorbent nature of this product, a constant weight is maintained during the rainy season as well as the dry season.

The **IROOF** possesses the special characteristics of self-cleaning mechanism when raining. The special ASA layer assures the resistance to moss gathering also and this is totally an animal resistant roofing solution. Due to the rigidity of the sheet, no any animal can damage or deteriorate the shape of the roofing sheets or accessories. This is a perfect sound insulation roofing solution too. The special ASA layer with other three layers, function as a sound barrier and lower the noise of the rain that falling on the roof. So a clam and quiet environment is maintained inside the home during the rainy seasons.

The Industrial Technology Institute of Sri Lanka (ITI) has tested **IROOF** and has certified that this product is fire retardant and unresponsive to acid rains or any other chemical contaminations.

Since this is not a metal base product that tends to corrosion, this is the ideal roofing solution for the coastal area.

There is no any other roofing product in the market that can be compared with the strength and the durability of **IROOF** roofing sheet. The unbelievable load bearing capacity of **IROOF** sheet has been proven by driving a vehicle of 3 tons weight on the sheet. For further information you may visit our website. (www.iroof.lk).

IROOF is manufactured in Sri Lanka at ultra-modern production facility equipped with the latest German technology. All the raw materials utilised in the production process are imported from an associate company of world renowned LG Company of Korea. Further the raw materials as well as the final products are continuously being tested to ensure quality, consistency and integrity.

Make your home a more comfortable, elegant looking and more reliable place to live in with **IROOF** branded roofing.
